

Instruction document for course registration for students

The registration

Registration for courses can be done before the beginning of each semester. The dates and a Lime Survey link will be shared with students via email and through the department's website to apply your preferences. To know more about the subject, you can use LSF and choose beforehand to be prepared better at the time of registration for subjects.

[Click here for LSF](#)

LSF

Here you can create your own schedule, search for the classes, courses, and seminars available, and enroll in them.

- Go to the LSF (Link right Button)
- Click on Login with UniAccount and log in with your account (the same for the e-mail)
- Change the Language (up of the page on the right corner)

[Click here
for LSF](#)

After login

Go to LECTURES - Then Course Overview - Click on Spatial Planning - Then on MSc Raumplanung

- You will find all the modules, information about the modules, timeslots, dates, and everything you need to know about the course (including information on the Prof and the Moodle link to get inside the course) -> There are intervals and phases where you can apply for seminars and courses, usually for max 25 participants. If you are too late and did not apply for any of them, you can write to the examination board and ask if there is a free spot and if you did not miss too many appointments (usually there is a max of 3 absences pro seminar) maybe you can still start with the course. Please do not write the professors directly!
- If you add the course to your calendar/schedule you will find it on Schedules
- Please note the language of instruction and apply to courses held in English only if you are part of the 'Urban Transformation' masters or with English as a medium of instruction as mentioned in the description of courses. There is also a separate tab for 'Lectures held in English' under the Spatial planning section

IMPORTANT

There are also German classes (but also a lot of other languages) available for international students and you won't find them on LSF but on ZHB (see at the end of this document). Additionally, if you like to do sport, there is a huge variety of different sports available for free or very cheap with the Hochschul-Sportkarte.

TIPP

Download the **TU Dortmund Application** on your phone, you will find your **SEMESTERTICKET** (all transportation means except ICE and ICE for the whole NRW!), and your schedule. It is important to note that the semester ticket may undergo changes because of the discussions between the council and student body. Please keep updated with the same through the university website. You can also look at the menu in all the canteens of the university, you can search for professors or people working at the university, receive all the news regarding the university, see your grades, credits once published, modules, and search for classes and location of the classes and much more.

LSF

LSF is the online university portal for students, prospective students, lecturers and employees. All courses are displayed in the LSF (course catalog).

Teachers can create and maintain their own courses there.

Request for activation of an employee access

For authorized use of the system, employees require access authorization (user name/password) for this system. Authorized use means that information or data of the system can be changed, deleted or newly entered for the respective facility or institution.

- Please note that there are a lot of students that want to have language classes. The process of enrollment is first comes first served, and you get a place only if you are faster than the others. Usually, classes start before the semester and you need to look for the starting date and hour of the enrollment time slot and be very fast if you want to get a place and don't become the last on the waiting list
- Please note that each language and levels in languages may have special requirements like placement test, please go through the requirements carefully in the given link
